

## RECOMMENDED READING II

*(Originally published March 1963)*

The January issue of the *Journal of the Medical Association of Georgia* has reprinted a non-medical address by J.L. Jones, a newspaper editor from Oklahoma. The article is entitled, "Let's Start Raising Hell." Since it expresses thoughts similar to those heard over and over in the lounge conversations, we feel sure you will enjoy it. Like the old quotation says, "You can always tell an intelligent man—his views are the same as yours."
